

Industrial Ironing Board

With a galvanised steel frame, this heavy-duty ironing board is both extremely sturdy and durable, providing the perfect area to carry out any type of ironing.

The board itself features a meshed design that allows steam to escape after it has passed through the fabric being ironed. This prevents moisture from building up and keeps the fabric dry.

The polyester cover is heat, stain and water-resistant as well as being easy to keep clean. Beneath the cover is a heavy underfelt that provides a consistent ironing surface and one that won't lose its shape like traditional foam.

The table is designed for busy laundries and is supplied with an extension pole ready to support gravity-fed steam irons. In addition, the pole features an electrical plug socket, allowing electrical cables to be suspended over head and clear of the ironing area.

Features / Benefits

- Heavy-duty galvanised steel frame.
- Mesh base for effective ventilation.
- Heat-resistant and easy to clean cover.
- Thick underfelt for a consistent ironing surface that won't lose shape.
- Extension pole with 15A plug socket.
